Master Ryuho Okawa

Founder and CEO of the Happy Science Group

Master Ryuho Okawa is world-renown for revealing answers to life's most fundamental questions and today's most pressing global issues. Since attaining great enlightenment, he founded Happy Science, has given more than 2,700 lectures, and published best-selling books loved by millions all over the world. He works tirelessly to teach how each of us can realize our own happiness, revealing the meaning of life, and also our differences - religious and cultural - so that we can understand and love each other better, in order to build an ever-brighter future, together.

This year he is traveling to Berlin and giving a lecture in Germany for the first time. This message will give us insight as to how to bring together conflicting values in these turbulent times.

[This event is for everyone, young and old. Do not miss this incredible opportunity to feel your inner light sparks alight.](#)

About Happy Science

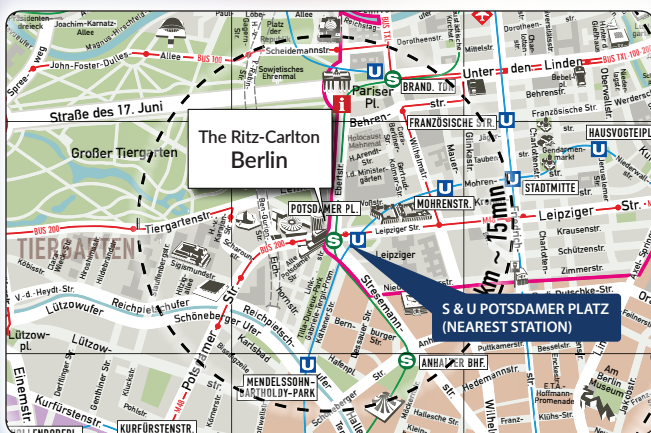

Happy Science is a Global Movement and Happiness Revolution working to make **YOU** a happier person and **THE WORLD** a happier place.

We have the motto, **EXPLORING THE RIGHT MIND**. This means to explore and awaken to our divine nature by putting into practice the Four Principles of Happiness, which are **LOVE** - to give love to others, instead of taking, **WISDOM** - to study spiritual Truth to gain higher perspective in life

and live in the Truth, **SELF-REFLECTION** - to examine our thoughts and purify our minds by overcoming an excessive ego, and **PROGRESS** - to share happiness and keep improving ourselves while contributing to creating a better world.

Creating a **HAPPIER** family, **HAPPIER** society and **HAPPIER** world starts from each one of us.
